

Konvert

OUTLOOK TELEPHONY

Microsoft Outlook Telephony Add-Ons

Simplify the way you work. Focus on business, not technology.

Before you answer a phone call, Konvert grabs the caller's profile in your database and displays it automatically on the PC screen. The profile can be data from local PC, a company shared folder, or a database. You can fully manage your normal telephone activities on screen, with the click of a mouse. With Konvert, you are able to control where, when, and how you want to receive and make your calls. Best of all, it's all integrated into Microsoft Outlook.
