Intelligent Monitoring

K'Sharp is the integration unit between the sensors and the telephone system. It is built and programmed to interact with any type of sensor and integrate them with the telephone system using Interactive Voice Response. The controller provides an economic and reliable platform, which can be used for many exciting applications. From systems monitoring to security, the only limitation is your imagination.

Features

- Real-time monitoring of sensors.
- Automatically trigger events such as IVRs, video recording, etc.
- Be notified by phone when sensors are activated and take action using keypad.
- Receive constant updates on office activity using your computer; including motion, light, and temperature sensors.
- Remotely check the status of your sensors from anywhere you have access to the Internet or a telephone.

Benefits

- Keep your building secure.
- Monitor workstation activity from MS Outlook.
- IVR calls you when sensors are activated.
- Control Sensors with a telephone keypad.
- Monitor employee productivity.
- Be Alerted if activity is detected during off hours.
- Receive a page or call when doors are opened.
- Control your communication system and security system with one system.
